PROFILING YOUR DIGITAL RISK

RSA[®]

DIGITAL RISK

UNWANTED AND OFTEN UNEXPECTED **OUTCOMES** THAT STEM FROM **DIGITAL TRANSFORMATION, DIGITAL BUSINESS PROCESSES** AND THE **ADOPTION** OF RELATED TECHNOLOGIES.

- **Cyber/Security** – risk of cyber attacks
- **Process Automation** – risks related to changes in processes from automation
- **Resiliency** – risk to availability of business operations
- **Third Party Risk** – inherited risk related to external parties
- **Cloud** – risks due to the change in architecture, implementation, deployment, and/or management of cloud operations
- **Workforce/Talent** – risks related to the dynamic nature of today’s workforce
- **Data privacy** – risks related to Personal Information
- **Compliance** – risks related to existing and emerging compliance requirements driven by new tech

CONTRIBUTING FACTORS

MAJOR CONTRIBUTING FACTORS

COMPLEXITY OF BUSINESS

Digital related Business Model and Strategy, Breadth of Products and Services, Industry

Simple Average Moderate Complex Highly Complex

DATA PROFILE

Types of data involved

Internal Confidential Highly Proprietary Regulated (PII, EPHI, etc.)

TECHNICAL COMPLEXITY

Complexity of technical architecture and technical changes within the organization

Minimal Low Moderate Complex Highly Complex

TECHNOLOGY STABILITY

Profile of technology used

Existing Infrastructure New but Reliant & Established Progressive Aggressive ("Bleeding edge")

CLOUD

Use of cloud technology

Minimal Moderate Considerable Extensive

TECHNICAL SCOPE

Size/number of technical components, e.g. devices and identities, e.g. users

Localized deployment Mid size enterprise Large Enterprise IoT/Consumer

MAJOR CONTRIBUTING FACTORS

GEOGRAPHIC SCOPE

Physical and logical locations including internal, supply chain, service providers and third parties and/or usage by consumers/customers

COMPLIANCE IMPACT

Scope of regulatory requirements, including privacy, industrial, environmental, labor laws, etc. taking into consideration emerging regulations

USE OF EXTERNAL PARTIES

Usage of cloud/third party providers, outsourced IT infrastructure

RESILIENCY REQUIREMENTS

Requirements for continuity and recovery

* PHYSICAL/DIGITAL INTERSECTION

RISK PROFILE: OPEN AND LIQUID

OPEN and LIQUID
Ecosystem based

XTRA FRUGAL
High Efficiency/Low Cost

'SKYNET'
Intensive automation

DATA POWERED
Intensive analytics

CUSTOMER CENTRIC
Front office heavy

CHARACTERISTICS

- Ecosystem of shared goals
- Flow of data between parties
- Collaboration; Crowd sourcing
- 'Shared' customer

RISK PROFILE

- 3rd Party
- Data privacy
- Cybersecurity
- Resiliency
- Compliance (depends on the data)

RISK PROFILE: XTRA FRUGAL

OPEN and LIQUID
Ecosystem based

XTRA FRUGAL
High Efficiency/Low Cost

'SKYNET'
Intensive automation

DATA POWERED
Intensive analytics

CUSTOMER CENTRIC
Front office heavy

CHARACTERISTICS

- Centralization, low costs, standardized models
- Process optimization
- 'Less is more'

RISK PROFILE

- Process automation
- Resiliency
- Cloud
- Workforce
- 3rd Party

RISK PROFILE: 'SKYNET'

OPEN and LIQUID
Ecosystem based

XTRA FRUGAL
High Efficiency/Low Cost

'SKYNET'
Intensive automation

DATA POWERED
Intensive analytics

CUSTOMER CENTRIC
Front office heavy

CHARACTERISTICS

- Use of machines to increase productivity
- Heavy manufacturing
- Automation and 'engineer' driven

RISK PROFILE

- Process Automation
- Cybersecurity
- Resiliency

RISK PROFILE: DATA POWERED

CLOSING THOUGHTS

RSA[®]

The background is a vibrant red color. It features a pattern of small, dark red dots arranged in a grid. Overlaid on this grid are several bright red, semi-transparent lines that radiate outwards from the center, creating a sense of depth and movement. The lines appear to be part of a larger, abstract structure, possibly representing a tunnel or a network of paths.
